

Measuring for Custom Soft Padded Pelmet

If you need to ask any questions, call, talk with us via live chat, or send us an e-mail, we'll be happy to help

1. Determine the Width

Make sure there is enough space on either side for the Pelmet to go past.

If measuring for Pelmet over any Recess Fit Blind

A. Measure the width in mm from the outer edge of the architrave to the opposite edge, and then:
Add 60mm to your above total width measurement, so that the pelmet will go past your architrave by 30mm on each side

If measuring for Pelmet over any Recess Fit Blind on a window without architraves (timber frame)

A. Measure the width in mm of the opening, and then:
Add 60mm to your above total width measurement, so that the pelmet will go past your window opening by 30mm on each side

If measuring for Pelmet over a Face Fit Blind

If ordering for over a face fit blind, measure the exact width in mm of the blind from end bracket to end bracket. If you are ordering your pelmet together with a new face

fitted blind then this should be the same width measurement you entered on that product, then:

Add 60mm to your above width measurement, so the pelmet will go past each side by 30mm

Nearly all face fix blinds run from either end of the architrave, check if your blind is measured or installed this way to ensure the returns clear the architrave.

Venetian Blinds cannot be face mounted with a pelmet, so you will need to top fix the blind, adjust the height as necessary in case you mount your pelmet higher than the top of the architrave.

2. Choose the Projection size on Order Page

The projection is how far into the room the pelmet will project from the wall, we make it easy to determine the projection by offering 5 set values to choose from on the order page, if you are placing more than one pelmet on the same wall it's best to have the same projection size for all of them:

80mm

This projection option can be chosen for over **any Recess fitted Blind**

100mm

This projection option is our most popular choice over **any Recess fitted Blind, Face Fit Single Roller Blind, or Face Fit Slimline 25mm Aluminum Venetian**

120mm

This projection option is perfect for over any **Roman Blind, any Face Fit Single Roller Blind, any Face Fit Venetian Blind**

150mm

This projection option is perfect for over any **standard single Curtain track or double roller blind**

200mm

This projection option is perfect for over any **standard double Curtain track or a Face Fit Vertical Blind**
